NEW ALLIANCE INTEGRATES COOL ROOFS WITH PHOTOVOLTAICS TO IMPROVE SOLAR POWER GENERATION

Coat 'N' Cool has established a strategic alliance with Advanced Powering Services, Montross Companies and Lineside Electric to integrate solar power with cool roofs, creating a more effective system to generate electric energy via photovoltaic cells. "The use of Coat 'N' Cool as an integral component of a solar installation improves reflectivity and has other benefits such as cooling a building's interior and enhancing the longevity of the roof itself that can significantly improve the operation and efficiency of the photovoltaic system," explains Michael Magallanes, Coat 'N' Cool Vice President of Sales.

Advanced Powering Services is a Rancho Santa Margarita, CA – based company that provides independent power sources including solar energy systems to business and industry. www.apsincorp.com

Montross Companies is a Lake Forest, CA – based company that is a full service roofing, decking and construction services. With Locations in Lake Forest and Modesto, Montross Companies is dedicated to providing quality services throughout the California marketplace. www.montrossweatherproofing.com

Lineside Electric is a San Juan Capistrano, CA – based company that is a full service electrical contractor with 4 years' experience in solar installation.
